Tents

- Tent weights are **MANDATORY**. No exceptions
- If you do not have sufficient tent weights you will be required to take your tent down and operate the remainder of the market without one. You may not leave early and will not be refunded your stall fee.
- If your tent cannot withstand the winds during the Market, you will be asked to take it down and continue the event without a tent. You may not leave early and will not be refunded your stall fee.
- The Market is not responsible for damage to tents from weather-related events.

Tent Weights

- Tent weights are essential for outdoor events. A small gust of wind can send a tent sailing aloft, even more when using sidewalls. Appropriately attached tent weights will help ensure your tent does not take flight, damage your inventory, the property of others, or cause physical injury to those around you.
- Tent weight must weight a minimum of 25lbs per tent leg and must be attached at all times
- Tent weights must be secured in a way that does not create additional safety hazards.
- Tent weights should not cause a tripping hazard.
- Tent weights should be tethered with clearly visible ropes, bungee cords, hooks etc.
- Tent weights must be secured around each tent's leg base or suspended from the top corners of each tent
- Commercial Tent Weights
 - Our recommendation is: [Eurmax Universal Weight Feet](#) when filled with sand each weights over 25lbs. They are easy to secure, sturdy, and are incredibly durable.
 - Pop-up bag style tent weights: These do not meet the required 25lbs minimum weight when filled with water, must be filled with sand or similar.
- DIY Tent Weights
 - Cement/sand filled PVC pipes are a popular alternative to commercial tent weights. They can be customized with handling hooks and carrying handles to make installation and transportation much easier.
 - There are many DIY videos and guides available online, if you chose this style weight just ensure you are able to securely attach them to your tent and they weigh the required 25lbs per tent leg.
- Insufficient tent weights
 - Insufficient tent weights include but are not limited to:
 - Water Jugs
 - Concrete blocks, bricks, rocks or similar
 - Dumbbells, weight lifting plates or similar
 - Ground stakes
 - Ties to Coolers, tables, merchandise or similar methods are not acceptable

Weather Policy

- The Vine Street Market is rain or shine. The market will carry on regardless of rain or temperatures. A delay in the morning may take place to avoid storms if possible. Every attempt to contact you will be made and we will post on social media. It is important that you do not opt out to emails in Manage My Market and have your cell phone number(s) on file.
- In case of severe weather during Market hours, all vendors will follow the emergency preparedness plan found in your Manage My Market account.
- If the market is cancelled before the opening bell, a weekend will be added to the end of the season. If excessive weather causes undue amounts of cancellations vendor booth prices will be prorated to reflect the missed markets.
- It is imperative your contact information is up to date in Manage My Market in case market staff need to send out emergency updates.
- Review the emergency preparedness plan in the documents section of your Manage My Market account.
- The garage doors will be open during the market, please plan accordingly on windy days. Strong gusts can occur inside The Station building.
- Stall fees will not be refunded for vendors who cancel due to weather.

Category Guidelines & Food Safety Laws: Grower/Producer

- All produce sold, such as fruits and vegetables, must be in season and grown within a 100-mile radius of the Market. Vendors outside this radius will be considered on a case-by-case basis.
- Vendors are solely responsible to operate within all laws and codes required by the State of Illinois and St. Clair County regarding technical information bulletins (TIB), labeling, inspections, certificates, food display and sanitation for any all products.
- Ideally, vendors should grow all the products they sell. Vendors may supplement their own products with local in-season agricultural products, not to exceed one-half of the vendor's products.
 - Purchased produce shall originate directly from local growers also within 100 miles of O'Fallon.
 - Purchased produce should not exceed 49% of a vendors' product on any given market date.
- Product pricing must be visible on a sign within the stall. If a product is purchased from another local farm, that farm name, city and state must be included on the sign.
- Your farm and/or the bill of sale for any purchased goods is subject to inspection by the Vine Street Market at any time with no notice.
- Value added products may be contracted to an inspected facility but must be made using the grower's produce (fruits/vegetables).

- Some suggestions for maintaining this temperature during sampling include using cold plates, ice packs or dry ice, and by rotating sample blocks regularly with refrigerated blocks.
 - Additionally, cheese portions should be covered between cuttings, such as by plastic wrap, or by glass or plastic lids.
 - During cutting, clean gloves should be used.
 - Additionally, any compromised product, due to overexposure to heat, contaminants, or otherwise should be thrown out.
 - Ice cream may be sold if it is manufactured in a licensed dairy facility or in a retail food establishment from commercially pasteurized ice cream mix.
- Eggs
 - An egg license issued by the IDOA is required for anyone who transports and sells eggs anywhere except on the farm where the eggs were produced.

 - Any form of refrigeration is acceptable, so long as the temperature requirements are met.
 - All eggs sold at farmers markets must be candled, graded, labeled, and packed according to the Illinois Egg and Egg Products Act.

- For a full list of requirements about pet food, treats and labeling see: [Pet Food as a Business](#)
- Proper licensing, registration and labeling will be required of any culinary vendor to sell pet treats at the Vine Street Market, even if you are making them in an inspected kitchen.

- Handwashing facilities must be provided if any of the following activities are being conducted:
 - Cutting, slicing, or dicing fresh fruits or vegetables.

 - serving potentially hazardous foods.
- Contact the local health department to determine if a handwashing facility is required.
- Water used for handwashing must be from a potable (drinkable) source.
- Hand sanitizer in place of handwashing is not allowed.

- A temporary handwashing station that is conveniently accessible is required at all permitted temporary food facilities.
- This must be set up prior to any food preparation.
- Provide a container with a spigot that allows hands-free flowing water, a wastewater bucket, a pump-type soap dispenser and single use/disposable paper towels.

 - The Vine Street Market retains the right to re-jury any vendor.

 - The artisan or crafter is encouraged to be present on market day. On the rare occasion that the artist or crafter is not available a knowledgeable representative may be accepted.

- Market staff are not tax professionals and cannot answer your tax questions, but we can direct you to people who can.

- Handlers who do not follow the pet policy or the City of O'Fallon leash ordinance will be asked to leave the Vine Street Market property.
- Pee On It, Pay for It:
 - If your pet goes to the bathroom on a vendor's product you are expected to pay in full for the damaged items and may be asked by the vendor or Market staff to do so. As a vendor, if a dog pees on your product, you have the right to request payment. Market staff can assist you in this process, however the police department may have to be involved.
 - If your pet goes to the bathroom on anything at the Market, please clean it up immediately. Market staff has a special cleaning kit and are happy to give it to you to clean up the mess.
- Retractable leashes are discouraged at the Market as they allow the pet too much unsupervised freedom. Please opt for a flat leash when you are at the Market. Loaner leashes are available.

Social Media

MENTION THE MARKET!

When you tag Vine Street Market (@vinestreetmarketofallon), it gives your customer a link to follow to our page and helps promote awareness and credibility as established brands!

WHAT SHOULD I POST?

Follow the **80-20 rule**: roughly 80% of your content should entertain or educate your customers, while only 20% or so should directly market your business. That 80% could include recipes for seasonal produce, attractive pictures of your fields and livestock, short "day in the life" stories or images, announcements of local food events, videos discussing your farming process, and planting advice for home gardeners.

CONSISTENCY IS KEY

Even if its twice a week, make sure you don't "ghost" your followers; make sure to post! If you go weeks between posts, it's unlikely that your audience is seeing your message frequently enough for it to be memorable and make an impact.

SPREAD THE WORD

Include your social media handles and URLs on business cards or have a sign at your booth that says where customers can find you! A vast majority of customers check updates about your business through social media and almost exclusively use social media messaging to ask questions!

Properly Anchor your Market Tent

.....

Tent weights are essential for outdoor events, and a small gust of wind can send a tent sailing aloft, even more when using sidewalls. Appropriate and securely attached weights will help to ensure your tent does not take flight and damage your inventory, the property of others, or cause physical injury to someone. Incorrectly weighted tents can cause all kinds of problems and expensive damage. Strong gusts can come up without warning anywhere, at any time.

Remember

-
- Tent weights must be attached at all times! Bungee cords and Gorilla Tape work great!
 - Completely secure your tent as soon as you set it up
 - If using multiple tents, secure tents to each other as well
 - Collapse your tent as soon as you remove its weights
 - DO NOT INTERRUPT this process as an incident can happen in seconds
 - Even adequately secured tents can be precarious during inclement weather conditions
 - "Pop-the-buttons" – alleviating the canvas tension, this can reduce problems
 - "Lower-the-legs" – reducing the tent height can reduce problems
 - "Remove the sail" – remove the canvas
 - Weights should be secured in a manner that does not create additional safety hazards.
 - Weights should not cause a tripping hazard
 - Weights should be tethered with clearly visible rubber bungee cords or ropes
 - Weights should have soft edges to avoid causing cuts, scrapes, and tripping
 - Weights should be suspended from the top corners to reduce the center of gravity or secured around each leg's base with a rubber bungee cord or rope.

Minimum Size

.....

25 to 40 pounds per leg for a tent 10' x 10' ft., the more weight, the better. If you are filling buckets with water, you'll need 5 gallons, with sand, you'll need about 3.2 gallons to create 40-pound weights. A tent 10' x 20' ft. and larger should be secured with 50 pounds on each leg.

How to Secure Weights

-
- Weights must be secured to the tent roof and the leg separately with the following methods:
- Nylon ratchet straps or rubber bungee straps (The best bungee cords are the black rubber ones; use the ones with two ridges on one side and are square on the other since these are much stronger and last longer than the cheaper oval ones.)
 - High-quality, heavy-duty rope
